

Clear 4 Chrome

Application Guide

Mix the Clear 4 Chrome at a ratio of 4:1 parts by volume with APCH-712 Hardener

1. Clean the surface to remove any smudges etc.
2. Apply 1-2 coats allowing 10-15 minutes between coats
3. (Optional) Follow with 1-3 coats of our Speed Clear SC1230 for added durability.
4. For maximum protection Clear 4 Chrome should be baked at 140° F for 2-4 hours or up to 250° F for a period of 1 hour .

**** Warning:** Clear4Chrome paint is highly flammable. Please take care in storing and applying it away from open flame or high heats. It is also poisonous if ingested, so please store it away from children.

Frequently Asked Questions

Q. What is Clear 4 Chrome?

A. Clear 4 Chrome is a clear coat product and can be combined with our Candy Concentrates to produce colored chrome finishes. It is a clear coat that achieves incredible adhesion to Chrome allowing you to clear coat your chrome and never have to polish it up again, or simply change it from chrome to gold in 1 easy step.
